According to the <br> data and information submitted the school is meeting the standards established in both <br> test \#1 and test \#2 for provision of athletic opportunities. The information submitted also <br> indicates that the standard for test \#3 is being met, but the responses on test \#3 (T-3) do <br> not appear to be supported by the responses on the most recent student survey. The <br> survey indicates that there is significant interest in both girls' soccer and girds' tennis. |

## Participation Opportunities Test One

|  |  | (Column 1) | (Column 2) | (Column 3) | (Column 4) |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Program | Enrollment | Percentage of Total Enrollment | Number of Interscholastic Participants (double and triple count) | Percentage of Total Participation |
| Row 1 | GIRLS | 127 | 51.8 \% | 90 | 50.8\% |
| Row 2 | BOYS | 118 | 48.2 \% | 87 | 49.2 \% |
| Row 3 | Totals | 245 | 100\% | 177 | 100\% |

Instructions:
*Number of $8^{\mathrm{dt}}$ grade students $\&$ below used in Column 3 and Column 4 calculations if applicable: $\qquad$ 7

1) Determine the total number of girls enrolled, (place in Row 1, Column 1).

Determine the total number of boys enrolled, (place in Row 2, Column 1).
2) Add the total number of girls and boys enrolled to determine total enrollment, (place in Row 3, Column 1).
3) Calculate the percentage of total enrollment that is female. (Divide Row 1, Column 1 by row 3, Column 1 and place in Row 1, Column 2.) Calculate the percentage of total enrollment that is male. (Divide Row 2, Column 1 by Row 3, Column 1 and place in Row 2, Column 2.) Note: Row 1, Column 2 plus Row 2, Column 2 should total 100\%.
4) Ask the head coaches to review the most updated eligibility or squad lists for their teams. Ask coaches to confirm the names of those individuals who are on the team as of the first date of competition, and cross out the names of those who were cut from the team or quit the team prior to the first competitive event. Determine the total number of interscholastic athletics participants that are girls, (and place in Row 1, Column 3). In order to determine the total number of athletics participants, an individual should be counted each time he or she participates on a team. For example, if Jane Doe competes on the varsity volleyball team, the junior varsity volleyball team, the junior varsity basketball team, and the varsity softball team, she should be counted as four participants (do not include club or intramural sports participants, cheerleaders, dance teams, or pom sqads). Calculate the same way for boys and girls. ${ }^{*}$ In addition, should $8^{\text {th }}$ grade students and below play on a Freshman, Junior Varsity, or Varsity team, they should also be counted for each team and sport on which they participate. If applicable, please asterisk the above notation as to how many $8^{\text {th }}$ grade students $\&$ below are included in the totals. Using the same procedure, determine the total number of interscholastic athletic participants that are boys, (and place in Row 2, Column 3). Add Row 1, Column 3 plus Row 2, Column 3 to get total participants and place in Row 3, Column 3.
5) Calculate the percentage of female participation. (Row 1, Column 3 divided by Row 3, Column 3 and place in Row 1, Column 4.)
Calculate the percentage of male participation. (Row 2, Column 3 divided by Row 3, Column 3 and place in Row 2, Column 4.) Note: Row 1, Column 4 plus Row 2, Column 4 should total 100\%.

Note: While being within three percent is not a formal compliance standard; if the percent listed in Row 1, Column 4 is within $3 \%$ of Row 1 , Column 2, then it provides a good target within which compliance is likely.

## Participation Opportunities Test Two

1) For Column 1, list the number of interscholastic teams offered for girls and boys at each competitive level (varsity, junior varsity, and freshman). For girls, total each of the entries in Rows 1, 2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8.
2) For Column 2, list the number of participants at each level. For girls, total each of the entries in Rows 1, 2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8. Note: The totals in Row 4 for girls and in Row 8 for boys must be the same as the totals in Form T-1, Column 3, Rows 1 and 2 respectively.
3) For Column 3, list the number of interscholastic teams that have been added in the last five years at each competitive level. Count each team added during the 5 year period only one time. e.g. Girl's junior varsity soccer was added 3 years ago, count the team only once, not 3 times. For girls, total the entries in Rows 1, 2, and 3 into Row 4 . For boys, total Rows 5, 6, and 7 into Row 8.
4) For Column 4, list the number of participants that are currently on each level of the teams that were added in the last five years. If a team was added previously but no longer exists, there are no current participants to be added for that team. For girls, total the entries in Rows 1,2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8.
5) For Column 5, calculate the percentage of participants that have been added in the last five years. For girls, take the number in Column 4, Row 4 and divide by the number in Column 2, Row 4. For boys, take the number in Column 4, Row 8 and divide it by the number in Column 2 , Row 8.

Note: If the percentage of current participants added in the last five years is $25 \%$ or greater, compliance with test two may be possible. If less than $25 \%$, then compliance with test three should be analyzed. CAUTION: $25 \%$ is not a formal compliance standard.
