Participation Opportunities Test One

		(Column 1)	(Column 2)	(Column 3)	(Column 4)
	Program	Enrollment	Percentage of Total Enrollment	Number of Interscholastic Participants (double and triple count)	Percentage of Total Participation
Row 1	GIRLS	318	50%	134	46%
Row 2	BOYS	316	50%	158	54%
Row 3	Totals	634	100%	292	100%

Instructions:

*Number of 8th grade students & below used in Column 4 calculations if applicable: _____

- 1) Determine the total number of girls enrolled, (place in Row 1, Column 1). Determine the total number of boys enrolled, (place in Row 2, Column 1).
- 2) Add the total number of girls and boys enrolled to determine total enrollment, (place in Row 3, Column 1).
- 3) Calculate the percentage of total enrollment that is female. (Divide Row 1, Column 1 by row 3, Column 1 and place in Row 1, Column 2.) Calculate the percentage of total enrollment that is male. (Divide Row 2, Column 1 by Row 3, Column 1 and place in Row 2, Column 2.) Note: Row 1, Column 2 plus Row 2, Column 2 should total 100%.
- 4) Ask the head coaches to review the most updated eligibility or squad lists for their teams. Ask coaches to confirm the names of those individuals who are on the team as of the first **date of competition**, and cross out the names of those who were cut from the team or quit the team prior to the first competitive event. Determine the total number of interscholastic athletics participants that are girls, (and place in Row 1, Column 3). In order to determine the total number of athletics participants, an individual should be counted each time he or she participates on a team. For example, if Jane Doe competes on the varsity volleyball team, the junior varsity volleyball team, the junior varsity basketball team, and the varsity softball team, she should be counted as four participants (**do not include club or intramural sports participants, cheerleaders, dance teams, or pom squads**). Calculate the same way for boys and girls. * In addition, should 8th grade students and below play on a Freshman, Junior Varsity, or Varsity team, they should also be counted for each team and sport on which they participate. If applicable, please asterisk the above notation as to how many 8th grade students & below are included. Using the same procedure, determine the total number of interscholastic athletic participants that are boys, (and place in Row 2, Column 3). Add Row 1, Column 3 plus Row 2, Column 3 to get total participants and place in Row 3, Column 3.
- 5) Calculate the percentage of female participation. (Row 1, Column 3 divided by Row 3, Column 3 and place in Row 1, Column 4.) Calculate the percentage of male participation. (Row 2, Column 3 divided by Row 3, Column 3 and place in Row 2, Column 4.) Note: Row 1, Column 4 plus Row 2, Column 4 should total 100%.

Note: While being within three percent is not a formal compliance standard; if the percent listed in Row 1, Column 4 is within 3% of Row 1, Column 2, then it provides a good target within which compliance is likely.

- 1) List the number of interscholastic teams offered for girls and boys at each competitive level (for example, varsity, junior varsity, and freshman levels). Total each of the entries in Column 1 into Row 4, Column 1 and Row 8, Column 1.
- 2) List the number of interscholastic teams that have been added in the last five years at each competitive level. Total each of the entries in Column 3 into Row 4, Column 3 and Row 8, Column 3.
- 3) List the number of participants that are currently on each level of the teams that were added in the last five years. Total each of the entries in Column 2 into Row 4, Column 2 for girls and Row 8, Column 2 for boys. If a team was added previously but no longer exists, there are no current participants to be added for that team.
- 4) List the number of participants added in the last 5 years. Total each of the entries made in Column 4 into Row 4, Column 4 for girls and Row 8, Column 4 for boys.
- 5) Calculate the percentage of participants that have been added in the last five years (Column 4 divided by Column 2 on each line). For example, if girls' varsity soccer (22 participants), junior varsity soccer (18 participants), junior varsity golf (8 participants), and freshman softball (15 participants) have been added in the last five years, then 63 participation opportunities have been added for girls. If the total number of female participants in the program is 96 (taken from Form T-1, Row 1, Column 3), then 65.6% of the current opportunities (63 of 96) have been added in the last five years. Perform similar calculations for male participants.

Note: If the percentage of current participants added in the last five years is 25% or greater, compliance with test two may be possible. If less than 25%, then compliance with test three should be analyzed. **CAUTION:** 25% is not a formal compliance standard.

TITLE IX GENDER EQUITY

Kentucky High School Athletic Association

**2001-2002
Annual Verification of Title IX Procedures
and
Title IX Corrective Action Plan**

EXECUTIVE SUMMARY

The Title IX – Gender Equity Committee for the 2001-2002 school year is a joint committee consisting of the SBDM Council and a committee of coaches, teachers, parents, student athletes, and administrators with Mrs. Valerie B. Slater, Guidance Counselor, serving as the coordinator. The SBDM Council is the chief administrative and governing body for all extra curricular and co-curricular activities and has oversight of the athletic programs.

2001-2002 ANNUAL REPORT AND CCORRECTIVE ACTION PLAN

1. Item #3 – Interest in addition of Girls Sports

In response to last year's survey which indicated an interest in track and cross country, we have implemented both a boys and girls cross-country team for the fall and a boys and girls track team for the spring season. We also advertised positions for a tennis coach since there was some interest and we already have one tennis court on campus. However, the one person who expressed interest in the position later declined when the SBDM offered him the job. Therefore, with no coach and the season approaching we were unable to offer the sport. We are presently talking with interested parties concerning the addition of soccer. Presently there is only one school in our area that is planning on offering this sport and again we lack the facilities or the land for expansion of facilities. We will continually look into the feasibility of adding these and any other sports that our annual survey indicates a significant interest exists.

2. Item #7 – Softball facility on Campus

A softball facility on campus remains as a major concern for the Gender Equity Committee and the SBDM Council. We presently do not have the land needed to have a softball field on campus. We are in the process of trying to acquire the land from the Kentucky Highway Department and to request the land to be filled when US 119 is constructed. We have had several meetings with their officials and state legislatures in hopes of securing this land and the fill for a softball field on campus. We are still awaiting their final decision.

We requested in writing to Superintendent Welch and the Pike County Board of Education to assist us with completing storage facilities and assisting with securing locker rooms and restroom facilities for the softball team at Mullins Elementary where the field is currently located. With the onset of the season approaching we are hoping this matter will be resolved.

3. KHSAA Follow-UP

Prime Time Contests/Girls' Basketball

We have examined the number of prime time games for both girls and boys basketball and have strived to make an increase since our audit in 2000. We have been able to increase the equity each year. As contracts are renewed, scheduling of games on the same nights, during prime time and during the week will be adjusted to ensure equality between the girls and boys varsity basketball teams. (Percentages of prime time games played are hereto attached.)

Volleyball Storage Facilities

As evidenced in the self-study there was a need identified for a locked storage area for volleyball. We have identified an area that could be used for this need. We have requested from the maintenance department of the Pike County Board of Education the fabricating of a caged area that is lockable and secure. However, this request to date has not been granted and we will submit another maintenance request.
