Louisville Male Traditional High School

Explanation of Expenditures

A. Equipment and Supplies

The major difference is found in the expenses incurred by football. This expenditure is a total that will be paid during the fall of 2003. This amount represents the order of new uniforms for football for the 2003-2004 season. This was included on this Title IX report because the order was placed on February 4, 2003. This amount can be omitted from this report and the spending would be in agreement with the number of participants of both boys and girls. This expense will be reported on the 2003-2004 Title IX report.

B. Travel

The expenditure incurred by the athletic department was lopsided basically because of the distance that had to be traveled and the number of buses utilized for these trips by the football program. A total of four buses (2-football, 1-cheerleaders, 1-parents) was used for each of the four games that were played a great distance from Louisville Male High School. This schedule was the result of not being able to schedule local teams within a close proximity to the school. This could not be helped if we wanted a complete football schedule. Expense in football includes the cheerleaders which can not be considered a sport of their own. The cheerleaders expense was also included in the basketball expenditures.

C. Coaches' Salaries

Coaching salaries are the direct result of experience in coaching staffs. For example, the football staff have all been coaching the maximum amount of years. Therefore, resulting in the top of the scale in coaching salaries. Boys' Basketball has 3 levels of play with 4 coaches while Girls' Basketball has only 2 levels of play with 3 coaches. The same for Boys and Girls Soccer. Baseball and Softball incur the same amount of expenditures. Boys' Track Coaches salaries represent two (2) coaches that also assist with the Girls' program because of their specialization (Discus/Shot Put Coach and Pole Vault Coach). They are listed as Boys' coaches simply because the Boys' team has more involvement in these areas.

Title IX Form Revisions*Revised Forms T-35 and T-36*

The amounts shown on the revised report are significantly different from the original report. In the original report, money spent by the booster clubs, team fund raising, and any other source of funds other than the budgeted amounts allotted to each team was not taken into account.

Travel Expense - amount budgeted/amount actually spent by each team

Awards - amount budgeted/actual expenditures

Coaches Salaries - please disregard the JCPS pay scale. I went back and calculated the actual pay of every coach for every sport. The total was recorded in the budgeted amount column. The expense column amounts denote the total amount spent per sport on coaches' salaries.

Facility Improvements - this includes the money actually spent on field maintenance and improvements.

- ⇒ In the case of softball, the amount includes the building of the lighting structure, installation of the lights, and completely resurfacing the playing area.
- ⇒ In the case of soccer and football, the amount incorporates the upkeep of the grass, replanting of the grass after damage, and the actual maintenance agreement of the irrigation company.
- ⇒ In the case of boys/girls soccer, the total amount spent on the facilities improvement included 3500 repair of the sprinkler system and grass. I divided the total amount among both sports since the facilities were shared equally.
- ⇒ The total amount was also divided for the rental of the facilities for practice and meets in swimming.

Form T-60

No form was included in the Title IX packet.

We will begin Freshmen Girls Soccer in the 2003-2004 season.

Row 3	Totals	1613	100%	649	100%

Instructions:

*Number of 8th grade students & below used in Column 4 calculations if applicable: 33

- 1) Determine the total number of girls enrolled, (place in Row 1, Column 1). Determine the total number of boys enrolled, (place in Row 2, Column 1).
- 2) Add the total number of girls and boys enrolled to determine total enrollment, (place in Row 3, Column 1).
- 3) Calculate the percentage of total enrollment that is female. (Divide Row 1, Column 1 by row 3, Column 1 and place in Row 1, Column 2.) Calculate the percentage of total enrollment that is male. (Divide Row 2, Column 1 by Row 3, Column 1 and place in Row 2, Column 2.) Note: Row 1, Column 2 plus Row 2, Column 2 should total 100%.
- 4) Ask the head coaches to review the most updated eligibility or squad lists for their teams. Ask coaches to confirm the names of those individuals who are on the team as of the first **date of competition**, and cross out the names of those who were cut from the team or quit the team prior to the first competitive event. Determine the total number of interscholastic athletics participants that are girls, (and place in Row 1, Column 3). In order to determine the total number of athletics participants, an individual should be counted each time he or she participates on a team. For example, if Jane Doe competes on the varsity volleyball team, the junior varsity volleyball team, the junior varsity basketball team, and the varsity softball team, she should be counted as four participants (**do not include club or intramural sports participants, cheerleaders, dance teams, or pom squads**). Calculate the same way for boys and girls. * In addition, should 8th grade students and below play on a Freshman, Junior Varsity, or Varsity team, they should also be counted for each team and sport on which they participate. If applicable, please asterisk the above notation as to how many 8th grade students & below are included in the totals. Using the same procedure, determine the total number of interscholastic athletic participants that are boys, (and place in Row 2, Column 3). Add Row 1, Column 3 plus Row 2, Column 3 to get total participants and place in Row 3, Column 3.
- 5) Calculate the percentage of female participation. (Row 1, Column 3 divided by Row 3, Column 3 and place in Row 1, Column 4.) Calculate the percentage of male participation. (Row 2, Column 3 divided by Row 3, Column 3 and place in Row 2, Column 4.) Note: Row 1, Column 4 plus Row 2, Column 4 should total 100%.

Note: While being within three percent is not a formal compliance standard; if the percent listed in Row 1, Column 4 is within 3% of Row 1, Column 2, then it provides a good target within which compliance is likely.

 - For Column 3, list the number of interscholastic teams that have been added in the last five years at each competitive level. Count each team added during the 5 year period only one time. e.g. Girl's junior varsity soccer was added 3 years ago, count the team only once, not 3 times. For girls, total the entries in Rows 1, 2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8.
 - For Column 4, list the number of participants that are currently on each level of the teams that were added in the last five years. If a team was added previously but no longer exists, there are no current participants to be added for that team. For girls, total the entries in Rows 1, 2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8.
 - For Column 5, calculate the percentage of participants that have been added in the last five years. For girls, take the number in Column 4, Row 4 and divide by the number in Column 2, Row 4. For boys, take the number in Column 4, Row 8 and divide it by the number in Column 2, Row 8.

Note: If the percentage of current participants added in the last five years is 25% or greater, compliance with test two may be possible. If less than 25%, then compliance with test three should be analyzed. **CAUTION:** 25% is not a formal compliance standard.

Student Suggestions to encourage participation

At Male H.S. we have 318 Girls AND 331 Boys participating in Athletics approx. 40% of our total student population. If we could count cheerleaders and dance team members our female participation would exceed our male participation in Athletics.
