 Rev. 8/03

Participation Opportunities Test One

		(Column 1)	(Column 2)	(Column 3)	(Column 4)
	Program	Enrollment	Percentage of Total Enrollment	Number of Interscholastic Participants (double and triple count)	Percentage of Total Participation
Row 1	GIRLS	601	48.9%	206	45.9%
Row 2	BOYS	629	51.1%	243	54.1%
Row 3	Totals	1230	100%	449	100%

Instructions:

*Number of 8th grade students & below used in Column 3 and Column 4 calculations if applicable: 41

- Determine the total number of girls enrolled, (place in Row 1, Column 1). Determine the total number of boys enrolled, (place in Row 2, Column 1).
- Add the total number of girls and boys enrolled to determine total enrollment, (place in Row 3, Column 1).
- Calculate the percentage of total enrollment that is female. (Divide Row 1, Column 1 by row 3, Column 1 and place in Row 1, Column 2.) Calculate the percentage of total enrollment that is male. (Divide Row 2, Column 1 by Row 3, Column 1 and place in Row 2, Column 2.) Note: Row 1, Column 2 plus Row 2, Column 2 should total 100%.
- Ask the head coaches to review the most updated eligibility or squad lists for their teams. Ask coaches to confirm the names of those individuals who are on the team as of the first **date of competition**, and cross out the names of those who were cut from the team or quit the team prior to the first competitive event. Determine the total number of interscholastic athletics participants that are girls, (and place in Row 1, Column 3). In order to determine the total number of athletics participants, an individual should be counted each time he or she participates on a team. For example, if Jane Doe competes on the varsity volleyball team, the junior varsity volleyball team, the junior varsity basketball team, and the varsity softball team, she should be counted as four participants (**do not include club or intramural sports participants, cheerleaders, dance teams, or pom squads**). Calculate the same way for boys and girls. * In addition, should 8th grade students and below play on a Freshman, Junior Varsity, or Varsity team, they should also be counted for each team and sport on which they participate. If applicable, please asterisk the above notation as to how many 8th grade students & below are included in the totals. Using the same procedure, determine the total number of interscholastic athletic participants that are boys, (and place in Row 2, Column 3). Add Row 1, Column 3 plus Row 2, Column 3 to get total participants and place in Row 3, Column 3.
- Calculate the percentage of female participation. (Row 1, Column 3 divided by Row 3, Column 3 and place in Row 1, Column 4.) Calculate the percentage of male participation. (Row 2, Column 3 divided by Row 3, Column 3 and place in Row 2, Column 4.) Note: Row 1, Column 4 plus Row 2, Column 4 should total 100%.

Note: While being within three percent is not a formal compliance standard; if the percent listed in Row 1, Column 4 is within 3% of Row 1, Column 2, then it provides a good target within which compliance is likely.

- 1) For Column 1, list the number of interscholastic teams offered for girls and boys at each competitive level (varsity, junior varsity, and freshman). For girls, total each of the entries in Rows 1, 2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8.
- 2) For Column 2, list the number of participants at each level. For girls, total each of the entries in Rows 1, 2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8. **Note:** The totals in Row 4 for girls and in Row 8 for boys must be the same as the totals in Form T-1, Column 3, Rows 1 and 2 respectively.
- 3) For Column 3, list the number of interscholastic teams that have been added in the last five years at each competitive level. Count each team added during the 5 year period only one time. e.g. Girl's junior varsity soccer was added 3 years ago, count the team only once, not 3 times. - 4) For Column 4, list the number of participants that are currently on each level of the teams that were added in the last five years. If a team was added previously but no longer exists, there are no current participants to be added for that team. For girls, total the entries in Rows 1, 2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8.
- 5) For Column 5, calculate the percentage of participants that have been added in the last five years. For girls, take the number in Column 4, Row 4 and divide by the number in Column 2, Row 4. For boys, take the number in Column 4, Row 8 and divide it by the number in Column 2, Row 8.

Note: If the percentage of current participants added in the last five years is 25% or greater, compliance with test two may be possible. If less than 25%, then compliance with test three should be analyzed. **CAUTION:** 25% is not a formal compliance standard.

4. For a sport currently offered at the varsity level only, is there sufficient interest to form a viable team for a junior varsity, or freshman team that is not currently offered?	No		No
5. For a sport currently offered at the junior varsity or freshman level is there sufficient interest to form a varsity team not currently offered?	No		No
6. If you answered YES to question (1), (2), (3), (4), or (5), are there enough high schools in your geographic area offering the sport (at the appropriate level) to allow for the development of a reasonable schedule of competition?	No		No

*Again, survey shows sufficient interest in boys wrestling ; however, starting a wrestling program for boys would create further imbalance between gender sports. There are insufficient number of schools in the area to fill schedule without extensive travel/additional expense.

Correction

The coaches salaries shown on the 2002-03 T35 and T36 were inadvertently listed as the actual salaries for that year and not the salaries for 2001-02. Therefore, those same salaries (for 2002-03) are shown again on the 2003-04 report.

All salaries are the same for boys/girls coaches in the same sport.

Larry,

Responding to the memorandum regarding incomplete Form T-63. In taking the survey (Form T-62) for a number of years now, this year I gave our students the following instructions:

"On question number 1, if your answer is YES (meaning we currently offer the sport(s) you want to play), do not mark any of the sports listed". Why would you? It does not ask what sport(s) you play, it ask what sport(s) you would like to play. Yes, means it is being offered. Play it.

"On question number 1, if your answer is NO, I WANT TO PLAY _____ then list the sport not currently offered that you would like to play. Those results are listed on the T-63. Why would you say "No, I want to play basketball" when basketball is offered.

"On question number 1, if your answer is I AM NOT INTERESTED IN SPORTS, skip to question number 9". Why would you indicate what sports you would like to play if you are not interested in sports?

All this to say: the numbers listed on our T-63 are the results of the students surveys. There are not any numbers for the sports we currently offer, only for sports we do not offer. Sure is a confusing survey, but guess I'll have to do different next time.
