Yes No

4. Checklist of the Title IX Components of the Interscholastic Program

Benefit to Students	Satisfactory	Deficient	Comments
Accommodation of Interests and Abilities	X		The school met the standard for compliance for Test 3 in the current (2009-2010) school year.
Equipment and Supplies	X		The original on-site visit status report recorded a deficiency in the provision of this benefit. Progress has been made since that time (2001). A schedule for purchase of new uniforms on a rotating basis has been established and the quality of uniforms was judged to be the same for both boys and girls. Shoes are provided for the two basketball teams, although the boys' team is provided two pairs and the girls' team only one. The baseball team is provided cleats; the softball players purchase their own. (See Section 10, comments.) Sports equipment appeared to be issued equitably.
Scheduling of Games and Practice Time	X		The school met the KHSAA requirement for the scheduling of girls' basketball HOME games for the 2009-2010 season. It was recommended to school personnel that the agendas of the seasonal Gender Equity Review Committee meetings include a review of schedules for all contests. No bias was noted in the scheduling of practice times.
Travel and Per Diem Allowances	X		Board of Education and school policies have outlined transportation modes and provision of per diem. They are the same for both male and female student-athletes.
Coaching	X		The ratio of coaches to athletes was equitable. The relative stability in employment of head coaches suggested an experienced staff. According to KHSAA records for team sports in the past five years, turnover of more than one head coach was limited to boys' basketball and volleyball. A differential of \$345 was found in the five-year-average salary of head coaches, which favored coaches of male sports. According to the salary schedule in the permanent Title IX file, coaching stipends are based on years of service as well as a tiered ranking for compensation by sport. This could have been the reason for the differential. Data were not available nor did time permit further analysis. Four head coaches of boys' sports and five for girls' teams were reported to be employed off the high school campus. A means for assuring that communication can occur between the coaching staff and athletes on those teams during the day should be established by school personnel.

Locker Rooms, Practice and Competitive Facilities		X	<p>Playing sites for male teams are better located, and access and convenience for spectators, parking, and seating are of a better quality.</p> <p>The primary concern remains the site and condition of the softball facility. Improvements have been made since the original on-site visit (2001) i.e. turf replacement and conditioning, new bleachers, press box/storage area built above the concession stand. However, Parents at the public meeting reported flooding remains a problem due to its proximity to a ground water collection point and the occasional deposit of animal carcasses on or around the outfield area. (This would appear to be a public health issue as well.) In addition to flooding conditions, the field site has only two toilets, which are used by players and spectators alike, male and female.</p> <p>The original on-site visit recorded a deficiency in locker room space for girls...Dressing areas and locker rooms were listed in the permanent Title IX file for all sports. However, proximity to playing facilities, furnishings, and maintenance are problem areas that continue to need priority. Male athletes have an advantage, given the sole use of locker room space provided for football and basketball. Only girls' basketball is provided sole use of a locker room, though it is smaller than that provided boys' basketball. In addition, it has a gang shower whereas the boys' basketball locker room has private shower stalls. The school's Corrective Action Plans over the past five years have indicated planned relief for the softball team and the two soccer teams in this area but progress remains slow. However, bids have been opened for improvements to the softball field that will include locker room space. Expected completion is March 26, 2010. (Plans were not available for review.)</p> <p>A major hesitancy for making improvements has been the planned construction of a new high school plant that will include development of athletic facilities that will contain locker room and storage space for all sports. The recent display on the district web site estimates the start of the project to be November 2010, with completion scheduled twenty-one months from Notice to Proceed.</p>
---	--	---	--

Medical and Training Facilities and Services	x		<p>The school employs a head and an assistant certified athletic trainer. There are well-equipped athletic training room areas that serve athletes of both genders. Coverage is provided all athletes. Policies are well developed.</p> <p>The weight room had a posted schedule for use. Review of time slots concluded an advantage was given male athletes. In addition, the general appearance of the facility did not have a gender-neutral orientation. There appeared to be an insufficient amount of equipment for use by female athletes. It was not clear which girls' teams used the weight room on a regular basis and which teams made other arrangements for physical training.</p>
Publicity	X		<p>The school has made improvements in this area. Boys' and girls' basketball schedule magnets are provided. Printed materials, however, still give boys an advantage. The football and baseball teams each have media guides whereas boys' and girls' basketball share a guide. No other girls' sport is provided any promotional material.</p> <p>The school has one cheerleading squad. Assignments for it, the dance team, and the pep band appeared to be equitable.</p> <p>The awards system needs further review regarding the equitable treatment of athletes in the purchase of leather jackets and championship patches... In addition, a standard school policy should be developed requiring a recognition activity of some kind at the end of the season for athletes of all sports</p>
Support Services		X	<p>Spending as reported on the re-visit forms was not reported accurately. Figures were the same as those posted on the 2008-2009 annual Title IX report, with few exceptions. The instructions were to post actual expenditures from July 1,, 2008 through June 30, 2009 Based on the reported expenditures averaged for the past five years, however there was no significant gender imbalance noted.</p> <p>School policies on purchasing appeared to provide adequate administrative oversight.</p> <p>Office space for coaches was varied and not</p>

Support Services Cont'd.			<p>well defined. Team records and files are kept off-campus in some instances. Because they are school property, a means of centralizing them should be initiated.</p> <p>A review of coaching aids for staff of both female and male teams should be conducted to assure equitable provision.</p> <p>Maintenance of facilities should be reviewed to assure an equal number of girls' and boys' sports are provided assistance. The same type of review should be undertaken as concerns provision of student managers, clerical assistance, and auxiliary personnel at HOME contests.</p> <p>It is recommended that the school's financial officer be a member of the Gender Equity Review Committee. The Committee would be enhanced, also, by the addition of another booster representative who is not a professional staff member, preferably someone affiliated with a sport played by both boys and girls.</p>

5. Brief Summary/Analysis of the Corrective Action Plan (Form T-74)

Focus has been on improvement of facilities for basketball, soccer, and softball; and, on the employment of an assistant softball coach and an assistant athletic trainer.

6. Observed Deficiencies in Overall Girls and Boys Athletics Programs

The area of facilities continues to impair the balance of benefits provided boys' and girls' teams. The recording of expenditures on the annual Title IX reports omitted expenditures by booster clubs in some instances.

7. KHSAA Recommended Action in relation to new deficiencies

A. School personnel will submit a revised Forms T-71 and T-72 from the re-visit report with the correct data requested, **by March 15, 2010.** OK

B. School personnel will provide a current signed copy of agreement between the school and each booster club, **by March 15, 2010.** OK

C. School personnel will list on Form T-60 (Corrective Action Plan) in the Title IX annual report, **due April 15, 2010**, a plan to coordinate all booster clubs in providing benefits to both male and female student-athletes in order to meet standards for compliance with Title IX. *Plan: all season tickets deposited in central athletic acct. @ school* OK

8. KHSAA Recommended Action in relation to reoccurring deficiencies

A. School personnel will submit a copy of the approved softball field improvements, to include the dimensions of the planned locker room with its restroom facilities, **by March 15, 2010.**

B. School personnel will list on Form T-60 (Corrective Action Plan) in the Title IX annual report, **due April 15, 2010**, additional items or areas to be improved at the softball field along with completion dates for those improvements. Suggestions: improve graveled access road to the field; define the parking area at the field; extend the area to be mowed by the parking area; place portable toilets during the season near the parking area for spectators; designate the existing restrooms for players only; refurbish restrooms as needed; place the field's name on the back of the concession stand or at another highly visible location; place gravel in the area between team dugouts and bleachers and the concession stand where water stands and mud results; repair all fencing; utilize planting to enhance general appearance; add the marking of the field to the duties of the school's grounds crew.

10. Comments

School personnel were prepared for the re-visit, though the athletics director and principal were not present due to personal and family illnesses. The superintendent of schools, the district Title IX coordinator, and other administrators attended.

The school's permanent Title IX file was available for review and virtually complete. Concerning minutes kept at Gender Equity Review Committee meetings, some were merely agendas and action taken not recorded. It was not clear how much import the Committee provided.

A well-conceived administrative manual for coaches has been compiled and distributed. It contains district and school policies that reflect support for and institutional control over the athletics program. Operating procedures were outlined and organized well for use by staff. However, signed agreements with all booster clubs were not found in the file. Without a centrally organized booster club, monitoring compliance with Title IX standards can become a significant challenge for school personnel. It is recommended that school personnel consider a consolidation of booster support under a single umbrella utilizing internal rather than external accounts.

A review is needed to clarify what athletic apparel or accessories constitute a uniform that is provided athletes, erg, shoes, cleats, in order to assess gender equity in this benefit. Also, it is recommended that the weight room be updated and supplied to reflect the intended use by both male and female athletes. The schedule of use for the weight room should be revamped to assure equitable time slots are available for female athletes.

It was not clear how the equitable purchase of awards and jackets was managed for sports that have no booster clubs. An explanation should be attached to the school's annual Title IX report. If corrective action is needed it should be an entry on Form T-60, Corrective Action Plan.

It is recommended that further efforts be made to promote attendance at girls' contests. Cheerleaders could lead this project. Schedule cards or posters should be provided for more girls' sports. Announcement of other spring sports competitions could be made during baseball and softball broadcasts.

The public meeting was attended by several members of the softball booster group whose concern was the quality of the softball facility, primarily the dugouts, dressing area, rest rooms, and drainage. The group had met with administration at an earlier date. The auditors clarified questions about Title IX standards and procedures and assisted in the amiable discussion that followed between the booster representatives and the district and school administrators present. The meeting adjourned at 5:50 pm.

Subject: BCHS Softball Field Improvements Project

MAY 24 2010

Importance: High

Mr. Bayes,

As we discussed, the following is the scope of work for the BCHS softball field improvements project:

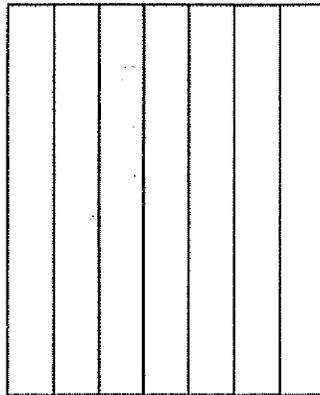

- Demolish the existing home team dugout and replace with a larger 16' X 30' dugout/locker room. The new dugout will be elevated approximately 4" above grade and sloped to allow for proper drainage.
- Demolish the existing visitor team dugout and replace with a larger 8' X 30' dugout. The new dugout will be elevated approximately 4" above grade and sloped to allow for proper drainage.
- The existing aluminum bleachers will be relocated to be between the new dugouts and concession stand for improved safety and visibility.

The project budget for these improvements is \$34,000.00. Geoff Riffe Construction Company, LLC. was awarded the contract for this project.

- Additional restroom facilities will be accomplished through the purchase/rental of portable toilets and a portable hand wash station.

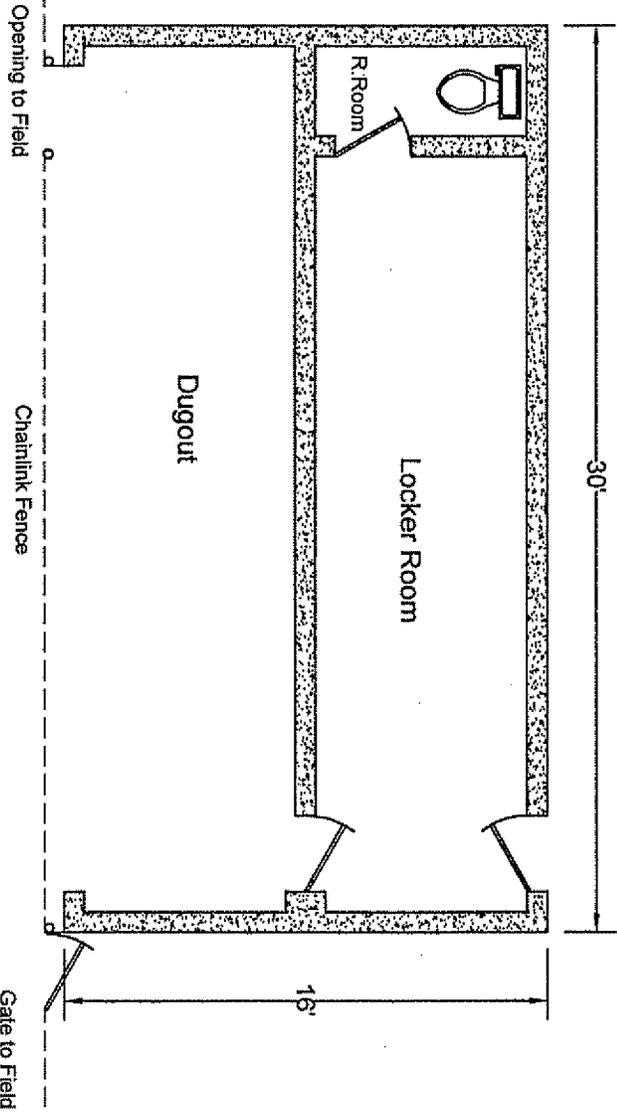

Thank You,

ATHLETIC BOOSTER CLUB AGREEMENT

This agreement is entered into by and between Boyd County Board of Education (hereafter referred to as "Board") and an entity known as Lady Lions Basketball (hereafter referred to as the "Booster Club"). Through this Agreement, the parties intend to set forth the Terms and Conditions under which the Booster Club may operate and associate with students, teachers, coaches and school administrators at Boyd High School.

We advertised for bids on Tuesday, January 26, 2010 for upgrading dugouts and repositioning the home side bleachers. Upgrades to the dugouts will consist of total replacement of the home-side dugout with a larger structure to include a locker room. The bleachers will be moved over between the dugout and concession stand. The length of the visitor dugout will be expanded by 6' and a new roof.

I forgot to mention in the first email, we plan to complete by March 26, 2010.

Thanks, Tim
