Levels of Competition Test One

Team Levels		
Total Number of Athletics Participants in All Levels	GIRLS	BOYS
1. Number of Varsity Teams Offered	7	7
2. Number of Participants on all Varsity Teams	(104)	(122)
3. Percentage of Total Varsity Participants By Sex	81	84
4. Total Number of <del>Male</del> Participants At All Levels	129	146
5. Number of Junior Varsity Teams Offered	4	4
6. Number of Participants on all Junior Varsity Teams	(36)	(42)
7. Percentage of Total Junior Varsity Participants By Sex	28	29
8. Number of Freshman Teams Offered	1	2
9. Numbers of Participants on all Freshman Teams	(11)	(20)
10. Percentage of Total Freshman Participants By Sex	9	14

- 1) Determine the number of teams at the varsity, junior varsity, and freshman levels for boys and girls. (#1, 5, 8)
- 2) Determine the total number of participants for boys and girls at each competitive level. (#2, 6, 9)
- 3) Calculate the percentage of female and male participants at each level. (3, 6, 9)  
 Example: Take the total number of female participants from the Summary Program Chart 1 (form T-1) and divide it into the number of total participants for each level, varsity, junior varsity and freshman levels. Perform the same calculation for male participants. For example, if there are a total of 300 female participants, and 180 girls are on varsity teams, 80 girls on junior varsity teams, and 40 girls on freshman teams, then 60% of girls' participation opportunities are at the varsity level (180 divided by 300), 27% are at the junior varsity level (80 divided by 300), and 13% are at the freshman level (40 divided by 300). If there are a total of 400 male participants, and 250 participate at the varsity level, 100 boys participate on junior varsity teams, and 50 boys participate on freshman teams, then 63% of boys participate at the varsity level (250 divided by 400), 25% compete at the junior varsity level (100 divided by 400), and 13% compete at the freshman level (50 divided by 400).

**Participation Opportunities Test Two**

Program	Number of Teams Currently Offered (1)	Number of Teams Added in Last Five Years (2)	Number of Participants Added in Last Five Years (3)	Percent of Total Participation By Sex (4)
GIRLS	varsity: 7	1	15	12
	j.v.: 4	1	5	4
	frosh: 1			
	other:			
	total: 12	2	20	16%
BOYS	varsity: 7			
	j.v.: 4			
	frosh: 2			
	other:			
	total: 13			

Calculate the number of interscholastic teams offered for girls at each competitive level (for example, varsity, junior varsity, and freshman levels).

Calculate the number of interscholastic teams that have been added in the last five years at each competitive level.

Determine the total number of participants that are currently on the teams that were added in the last five years.

Calculate the percentage of participants that have been added in the last five years. For example, if girls' varsity soccer (22 participants), junior varsity soccer (18 participants), junior varsity golf (8 participants), and freshman softball (15 participants) have been added in the last five years, then 63 participation opportunities have been added for girls. If the total number of female participants in the program is 300, taken from form T-1, column 4 then 21% of the current opportunities (63 of 300) have been added in the last five years. Note: The total number of male/female participants should be the same as item 4 on Summary Program Chart 1 on form T-1.

Note: If the percentage of current female participants added in the last five years is 25% or greater, compliance with test two may be possible. If less than 25%, then compliance with test three should be analyzed. CAUTION: 25% is not a minimal compliance standard. The count shall be taken on the first day of competition for students that are officially members of the team.
