Row 1	GIRLS	208	50.48	109 <del>77</del>	49.32
Row 2	BOYS	204	49.52	112 <del>78</del>	50.68
Row 3	Totals	412	100%	221	100%

Instructions:

\*Number of 8<sup>th</sup> grade students & below used in Column 4 calculations if applicable: \_\_\_\_\_

- Determine the total number of girls enrolled, (place in Row 1, Column 1). Determine the total number of boys enrolled, (place in Row 2, Column 1).
- Add the total number of girls and boys enrolled to determine total enrollment, (place in Row 3, Column 1).
- Calculate the percentage of total enrollment that is female. (Divide Row 1, Column 1 by row 3, Column 1 and place in Row 1, Column 2.) Calculate the percentage of total enrollment that is male. (Divide Row 2, Column 1 by Row 3, Column 1 and place in Row 2, Column 2.) Note: Row 1, Column 2 plus Row 2, Column 2 should total 100%.
- Ask the head coaches to review the most updated eligibility or squad lists for their teams. Ask coaches to confirm the names of those individuals who are on the team as of the first date of competition, and cross out the names of those who were cut from the team or quit the team prior to the first competitive event. Determine the total number of interscholastic athletics participants that are girls, (and place in Row 1, Column 3). In order to determine the total number of athletics participants, an individual should be counted each time he or she participates on a team. For example, if Jane Doe competes on the varsity volleyball team, the junior varsity volleyball team, the junior varsity basketball team, and the varsity softball team, she should be counted as four participants (**do not include club or intramural sports participants, cheerleaders, dance teams, or pom squads**). Calculate the same way for boys and girls. \* In addition, should 8<sup>th</sup> grade students and below play on a Freshman, Junior Varsity, or Varsity team, they should also be counted for each team and sport on which they participate. If applicable, please asterisk the above notation as to how many 8<sup>th</sup> grade students & below are included. Using the same procedure, determine the total number of interscholastic athletic participants that are boys, (and place in Row 2, Column 3). Add Row 1, Column 3 plus Row 2, Column 3 to get total participants and place in Row 3, Column 3.
- Calculate the percentage of female participation. (Row 1, Column 3 divided by Row 3, Column 3 and place in Row 1, Column 4.) Calculate the percentage of male participation. (Row 2, Column 3 divided by Row 3, Column 3 and place in Row 2, Column 4.) Note: Row 1, Column 4 plus Row 2, Column 4 should total 100%.

Note: While being within three percent is not a formal compliance standard; if the percent listed in Row 1, Column 4 is within 3% of Row 1, Column 2, then it provides a good target within which compliance is likely.

- 1) List the number of interscholastic teams offered for girls and boys at each competitive level (for example, varsity, junior varsity, and freshman levels). Total each of the entries in Column 1 into Row 4, Column 1 and Row 8, Column 1.
- 2) List the number of interscholastic teams that have been added in the last five years at each competitive level. Total each of the entries in Column 3 into Row 4, Column 3 and Row 8, Column 3.
- 3) List the number of participants that are currently on each level of the teams that were added in the last five years. Total each of the entries in Column 2 into Row 4, Column 2 for girls and Row 8, Column 2 for boys. If a team was added previously but no longer exists, there are no current participants to be added for that team.
- 4) List the number of participants added in the last 5 years. Total each of the entries made in Column 4 into Row 4, Column 4 for girls and Row 8, Column 4 for boys.
- 5) Calculate the percentage of participants that have been added in the last five years (Column 4 divided by Column 2 on each line). For example, if girls' varsity soccer (22 participants), junior varsity soccer (18 participants), junior varsity golf (8 participants), and freshman softball (15 participants) have been added in the last five years, then 63 participation opportunities have been added for girls. If the total number of female participants in the program is 96 (taken from Form T-1, Row 1, Column 3), then 65.6% of the current opportunities (63 of 96) have been added in the last five years. Perform similar calculations for male participants.

Note: If the percentage of current participants added in the last five years is 25% or greater, compliance with test two may be possible. If less than 25%, then compliance with test three should be analyzed. **CAUTION:** 25% is not a formal compliance standard.
