		(Column 1)	(Column 2)	(Column 3)	(Column 4)
	Program	Enrollment	Percentage of Total Enrollment	Number of Interscholastic Participants (double and triple count)	Percentage of Total Participation
Row 1	GIRLS	521	47.41%	224	41.10%
Row 2	BOYS	578	52.59%	321	58.90%
Row 3	Totals	1099	100%	545	100%

Instructions:

\*Number of 8<sup>th</sup> grade students & below used in Column 3 and Column 4 calculations if applicable: 73

- Determine the total number of girls enrolled, (place in Row 1, Column 1). Determine the total number of boys enrolled, (place in Row 2, Column 1).
- Add the total number of girls and boys enrolled to determine total enrollment, (place in Row 3, Column 1).
- Calculate the percentage of total enrollment that is female. (Divide Row 1, Column 1 by Row 3, Column 1 and place in Row 1, Column 2.) Calculate the percentage of total enrollment that is male. (Divide Row 2, Column 1 by Row 3, Column 1 and place in Row 2, Column 2.) Note: Row 1, Column 2 plus Row 2, Column 2 should total 100%.
- Ask the head coaches to review the most updated eligibility or squad lists for their teams. Ask coaches to confirm the names of those individuals who are on the team as of the first date of regular season competition, and cross out the names of those who were cut from the team or quit the team prior to the first regular season competitive event. Determine the total number of interscholastic athletics participants that are girls, (and place in Row 1, Column 3). In order to determine the total number of athletics participants, an individual should be counted each time he or she participates on a team. For example, if Jane Doe competes on the varsity volleyball team, the junior varsity volleyball team, the junior varsity basketball team, and the varsity softball team, she should be counted as four participants (do not include club or intramural sports participants, cheerleaders, dance teams, or pom squads). Calculate the same way for boys and girls. \* In addition, should 8<sup>th</sup> grade students and below play on a Freshman, Junior Varsity, or Varsity team, they should also be counted for each team and sport on which they participate. If applicable, please asterisk the above notation as to how many 8<sup>th</sup> grade students & below are included in the totals.  
 Using the same procedure, determine the total number of interscholastic athletic participants that are boys, (and place in Row 2, Column 3). Add Row 1, Column 3 plus Row 2, Column 3 to get total participants and place in Row 3, Column 3.
- Calculate the percentage of female participation. (Row 1, Column 3 divided by Row 3, Column 3 and place in Row 1, Column 4.) Calculate the percentage of male participation. (Row 2, Column 3 divided by Row 3, Column 3 and place in Row 2, Column 4.) Note: Row 1, Column 4 plus Row 2, Column 4 should total 100%.

Note: While being within three percent is not a formal compliance standard; if the percent listed in Row 1, Column 4 is within 3% of Row 1, Column 2, then it provides a good target within which compliance is likely.

	Row 8	total:	17	321	4	55

- 1) For Column 1, list the number of interscholastic teams offered for girls and boys at each competitive level (varsity, junior varsity, and freshman). For girls, total each of the entries in Rows 1, 2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8.
- 2) For Column 2, list the number of participants at each level. For girls, total each of the entries in Rows 1, 2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8. **Note:** The totals in Row 4 for girls and in Row 8 for boys must be the same as the totals in Form T-1, Column 3, Rows 1 and 2 respectively.
- 3) For Column 3, list the number of interscholastic teams that have been added in the last five years at each competitive level. Count each team added during the 5 year period only one time. e.g. Girl's junior varsity soccer was added 3 years ago, count the team only once, not 3 times. For girls, total the entries in Rows 1, 2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8.
- 4) For Column 4, list the number of participants that are **currently** on each level of the teams that were added in the last five years. If a team was added previously but no longer exists, there are no current participants to be added for that team. For girls, total the entries in Rows 1, 2, and 3 into Row 4. For boys, total Rows 5, 6, and 7 into Row 8.
- 5) For Column 5, calculate the percentage of participants that have been added in the last five years. For girls, take the number in Column 4, Row 4 and divide by the number in Column 2, Row 4. For boys, take the number in Column 4, Row 8 and divide it by the number in Column 2, Row 8.

**Note:** If the percentage of current participants added in the last five years is 25% or greater, compliance with Test Two may be possible. If less than 25%, then compliance with Test Three should be analyzed. **CAUTION:** 25% is not a formal compliance standard.

**Title IX / Gender Equity Committee Notes**

The following represent issues/concerns discussed by the committee with regards to "red flags" the committee felt were present in the 2007-08 KHSAA Title IX audit.

- Following review of the Student Survey, the committee felt that while surveys indicated some interest in the sport of soccer continues, however, this issue was raised two years ago during our last survey. At that time two meetings were held after school hours for those interested in soccer. Attendance was low and it appeared that level of interest was greater in the younger age groups.

The committee noted that the only community soccer program in the county is at the elementary level and that these programs end somewhere around the 5<sup>th</sup>/6<sup>th</sup> grade. The committee felt that interest levels would be monitored but until there was a more developed feeder program through grade 8, the addition of a soccer program would be difficult.

Thought was given to soccer at the middle school level, sponsored by the school system. However it was noted that our five elementary/middle schools do not sponsor athletic programs for middle school students other than in the sports of football, volleyball and basketball and that the school administration has shown no interest in establishing such programs.

- In reviewing the report the committee noted that the school has added JV sports to 4 sports (golf, tennis, track and swimming) during the last few years. An increase in number of participants indicated this need; however, it has been a struggle in various situations trying to find opponents for these teams to compete against.
- Committee discussed at length the "cost" of participation upon parents/students and noted that survey indicated this was a growing concern. In addition several parents have discussed the issue with administration and staff regarding cost of transportation to and from practice. It was noted that this is of great concern due to the fact that we have some students who live up to 20 miles away from the high school.
- Committee noted the funding imbalance between baseball and softball listed on the report. In reviewing this imbalance, it was noted that the 06-07 school year was the designated year for uniform purchase for baseball and that baseball had an overnight tournament scheduled this year which significantly raised the cost of baseball's transportation cost. Additionally, the committee reviewed the previous three-five years spending habits in baseball and softball. It was noted that this did not appear to be a consistent trend/issue but felt it would be best to closely monitor the situation prior to and during the 08-09 school year. The committee felt that a meeting with both the softball and baseball coaches regarding the issue would be appropriate prior to the 08-09 school year.

**Item #1: Locker Room Improvements G-BKB**

With the opening of the new Academic-Athletic facility, the school has been able to shift locker room assignments around to equalize space and support of comparable sports. Primarily the girl's basketball locker room has been moved across the gym to a locker room that is comparable in size to that of the boy's basketball locker room. In addition, lockers have been purchased that are of similar style to those found in the boy's basketball locker room for varsity players. These new lockers however are of steel construction as compared to the wooden lockers in the boy's locker room. The reason for this difference is primarily because of the excessive amount of moisture in the locker room, the lockers in the boy's locker room have become somewhat of an on-going maintenance issue. It was felt by maintenance and custodial services that in the light of the issues surrounding staph/MRSA infection control; a metal would be better than wood when purchasing new lockers.

In addition to this change, other changes in locker room assignments were made to give teams closer access to practice areas, storage rooms, etc.

**Item #2: Individual Sports Spending**

Continue to monitor fund-raising/spending of individual sports and encouraging joint fund raising between similar sports. Booster Club continues to monitor spending/history and continuing practice of spending for all sports. With limited funds Booster Club feels it cannot support every sport every year but can in a 3-5 year window provide funding for all programs.

**Item #3: Girl's Participation Levels**

On-Going, have had increases in girls' numbers in some sports while numbers remain low in others.

**Item #4: Increased Sports Offerings**

School has started an archery program during the 2007-08 school year. This program involved 70-80 participants; a majority of which are not involved in any other athletic team. This program met two nights a week for three hours each night.

Attempt was made to start a fitness program after school for staff and students, however, enrollment in classes (spinning, jazzercising & karate) were insufficient for continuation at the present time.

The start-up of Intramural programs was delayed due to questions regarding staffing, cost and facility availability.

**Item #5: Facilities**

With one year of utilization of the new facility under our belt, the school feels it has a better handle on what types of programs and the amount of time programs will utilize space available. Because of this, the school can further develop/monitor equitable use of facilities.
