# PRELIMINARY

SCHOOL YEAR 2016-2017  
 TITLE IX IMPROVEMENT PLAN  
 Hancock County

*AK*  
*gluey*  
 5-17-17

- DIRECTIONS:**
- For Column 1, indicate the intended area (Opportunities or Benefits) which needs improvement in order to achieve gender equity. For Column 2, write the suggested change or activities that will improve the area in need of alteration. For Column 3, include the estimated completion date for the changes or activities.
  - It is possible to attain compliance with Title IX and no longer need improvement. However, the KHSAA strongly encourages schools to identify items for improvement (Column 1), activities to accomplish the improvement (Column 2) and a timetable for completion (Column 3) that will strengthen the athletic program

COLUMN 1	COLUMN 2	COLUMN 3
SPECIFIC ITEM FOR IMPROVEMENT	PLAN FOR SUGGESTED CHANGE	START DATE AND COMPLETION DATE OF IMPROVEMENT
Target interest level for new sports (Girls Soccer)	Information coming through the student surveys.	Start: May 1, 2017 Complete: May 1, 2018
Equipment suitable for use by female athletes to be provided for in weight room	Hancock County High School will purchase equipment suitable for use by our female athletes	Start: Oct 3, 2016 Complete: May 31, 2018

Principal's Signature: \_\_\_\_\_ Date: \_\_\_\_\_

# Hancock County High School Emergency Action Plan

ok  
sluff  
4-17-17

**Hancock County High School Athletics**  
**80 State Route 271**  
**Lewisport, Kentucky 42348**

## **Purpose of EAP:**

To provide Hancock County High School Athletics with an emergency action plan (EAP) in case of a serious or life-threatening condition that arises during practice or competitions. The athletic director, coaches, and others involved in athletics must constantly be on guard for potential injuries, and although the occurrence of limb-threatening or life-threatening emergencies is not common, the potential exists. Therefore, prepared emergency responders must have planned in advance for the action to be taken in the event of such an emergency.

## **Need for EAP:**

The EAP has been categorized as a written document that defines the standard of care required during an emergency situation. Serious emergencies rarely happen but when they do, a quick, organized response can make a difference between a successful and unsuccessful reaction to an emergency. An EAP that is well planned and rehearsed will provide responders with the approach they need for an effective response. Also of significance is the legal basis for the development and application of an emergency plan. It is well known that organizational medical personnel, including coaches, have a legal duty as reasonable and prudent professionals to ensure high-quality care of the participants.

## **Emergency Contacts:**

Fixed phones are not available in some locations outside of the school building. A phone is available inside the main office and coach's office and can be used for sports played inside school (ie. volleyball, basketball). In the instance that a fixed phone line is not available, cell phones are carried by the administrator in attendance, coaches, and athletic staff and even spectators if necessary. The following is a list of important phone numbers needed in case of emergency:

## **Emergency Contact Phone Numbers:**

Athletic Director Cell Phone(AD).....	270-929-5803
Principal Cell Phone.....	270-314-0050
Assistant Principal Cell.....	270-316-3199
Dean of Students.....	270-315-5377
School Office Phone.....	270-927-6953
Hancock County Board of Education.....	270-927-6914

Hancock County Emergency Operations.....	270-927-1310
Hancock County Sheriffs Office.....	270-927-6247
Hawesville Fire Department.....	270-927-8498
Lewisport fire Department.....	270-295-3321
South Hancock Fire Department.....	270-233-3473
Dukes Fire Department.....	270-927-8575
Ambulance, Fire, Police.....	911
Poison Control Center.....	800-222-1222

Information to be provided over the phone in case of emergency:

1. Name and phone number you are calling from
2. Exact location of emergency and directions (street names, buildings, landmarks, entry into building, specific areas, etc.)
3. Type of injury or illness
4. Condition of patient(s) and type of aid being provided
5. Number of people injured
6. Other information as requested and be the last one to hang up

The Hancock County High School Administrator in attendance or the head coach (afterwards called The Administrator) will make the decision to call EMS and will personally make the call or they may assign a responsible person to call. Local EMS should also have a map of campus to aid in the response of an emergency. A map is located at the end of this document.

**Chain of Command:**

1. Certified Athletic Trainer
2. Head Coach
3. Assistant Coach
4. Athletic Director
5. Administrator

The CAT or Head Coach is in charge of emergency until EMS arrives. The only exceptions are if the visiting team has an athletic trainer or team doctor, who is responsible for their team.

**Emergency Qualifications:**

It is required that coaches and coaches are all trained in CPR and first aid. All athletic staff will be trained in first aid including but not limited to CPR and use of AED. It is recommended that all personnel also be trained in the prevention of disease transmission. New athletic department personnel will comply with this rule as soon as possible. EMS may or may not be on site for games or practices since they are located close enough to respond quickly to an emergency. Visiting teams should also be informed of EAP procedures.

### **Responsibilities of Emergency Team Members:**

During home games, the home team Administrator and the visiting coach or administrator are responsible for their own teams but may assist the other coach if needed. Since there is only one AD on campus, all coaches are responsible for emergencies during practice and games until the AD, EMS, or doctor arrives on scene. Since insurance coverage varies among athletes, parents may decide how their athlete is cared for and where they are cared for. Parents are the primary person to accompany student to hospital. If parents are not around, an assistant coach will accompany athlete to hospital.

### **Equipment and Supplies:**

All available supplies and equipment are stored in the coaches office, carried with the coaches or in the case of AEDs at the Athletic Complex, inside the Gymnasium and inside the Principal's Office in the Main building. All available equipment will be on site for games and quickly accessible including a fully stocked and complete medical kit for all games and competitions. Coaches are required to carry a medical bag to all competitions. Equipment should be in good condition and personnel must be trained, in advance, to use it properly. To ensure that emergency equipment is in working order, all equipment should be checked on a regular basis. In addition, medical records and emergency contacts for all athletes should be available both at the school and on the road.

### **Environmental Conditions:**

In case of lightning, referee, AD or Head Coach is responsible for the decision to stop the game. However, ATC can inform referee and/or athletic director of possible hazard. Heat issues are not usually a problem in this area except during summer pre-season practice, especially during football. Cold conditions are also a possibility in this area. The AD and Coaches should be current on both heat and cold injuries signs and symptoms and be able to treat ill or injured athlete(s) accordingly. If the situation does arise where weather conditions might affect athletes, the coach or AD will keep track of weather conditions via psychrometer.

In case of a fire, everyone inside building will proceed to nearest exit and remain outside and away from building. Someone should also call 911 to inform them of situation. In case of an earthquake, everyone inside school will immediately drop, cover, and hold on. If necessary, move only a few steps to a nearby safe place avoiding windows. Stay indoors until the shaking stops and you're sure it's safe to exit.

If inside the school, expect the fire alarms and maybe sprinklers to go off during a quake. If you are outdoors, find a clear spot away from buildings, trees, and power lines and drop to the ground. Once the shaking stops check yourself and others for injuries. Expect aftershocks and each time you feel one, drop, cover, and hold on. Get everyone out if your home is unsafe. Someone should also call 911 to inform them of situation.

### **Emergency Care:**

Apply basic emergency care as situation requires. Care might include:

1. Check life threatening conditions
2. Level of consciousness – if unconscious call 911 immediately
3. Airway—is airway blocked
4. Breathing – is person breathing
5. Circulation—does person have pulse
6. Bleeding—is person bleeding severely
7. Call 911 now if necessary

Apply basic first aid as situation requires

1. Adult CPR: 30 compressions then every 2 breaths
2. Bleeding: direct pressure over injury;
  - a. Elevate injury over heart if possible
  - b. Apply sterile dressing over injury
3. Splint fractures
4. Cervical Collar – apply if suspected neck injury; prevent any movement of neck when applying cervical collar
5. Spine Boarding – use if suspected head, neck or spine injury; prevent any movement of spine while attaching to spine board
6. Treat for Shock – if necessary

Any other emergency procedures as necessary - Other things to consider during emergency situation:

1. Reassure and calm athlete
2. Don't move severely injured athlete unless he/she is in danger
3. Don't reduce fractures or dislocations
4. Sufficient lines of vision between the medical staff and all available emergency personnel should be established and maintained
5. Once the medical staff begins to work on an injured player, they should be allowed to perform services without interruption or interference
6. Keep players, coaches, spectators away and prevent them from helping injured athlete

## Coaches Role in Athletic Injury Care and Management

An Emergency Action Plan is essential to the safety of our athletes and to the effective management of ALL athletic related injuries. As we continue to develop our plans it is extremely important that all head and assistant coaches understand their roles in the management of athletic injuries.

### Protocol 1

Games with Certified Athletic Training (ATC) Coverage:

1. Notify ATC of athletic injury
2. Help clear unnecessary persons away from the injury
3. Assist ATC in activation of EMS if necessary
4. Assist the advanced emergency care upon request
5. If an athlete is to be shipped to the hospital an assistant coach should gather insurance information, consent to treat, medical history, and emergency contact information
6. If parents are not there an assistant coach will travel to the hospital with the athlete.
7. Complete accident report and turn in to AD Office within 24 hours.

### Protocol 2

Practices with ATC Coverage:

1. Notify ATC of athletic injury
2. Help clear unnecessary persons away from the injury
3. Assist ATC in activation of EMS if necessary
4. Assist the advanced emergency care upon request
5. If an athlete is to be shipped to the hospital an assistant coach should gather insurance information, consent to treat, medical history, and emergency contact information
6. Complete accident report and turn in to AD Office within 24 hours.

### Protocol 3

Practices and games without ATC Coverage

1. Provide appropriate first aid
2. Activate EMS if necessary
3. If an athlete is to be shipped to the hospital an assistant coach should gather insurance information, consent to treat, medical history, and emergency contact information
4. If parents are not there an assistant coach will travel to the hospital with the athlete.
5. Contact ATC as soon as possible
6. Contact parent/guardian as soon as possible
7. Complete accident report and turn in to AD Office within 24 hours.

### General Guidelines

- The head coach is responsible for assuring the presence of the EMERGENCY FORMS/INSURANCE INFORMATION for all student athletes. Make sure these forms are always readily accessible at all games and practices. Please see the AD to get all this information.
- All coaches must maintain current First Aid/CPR certification and complete Medical Symposium on the KHSAA website.
- All coaches must be familiar with HCHS Emergency Action Plan for practice and game venues for which their team will use.

All medical records should be kept at the school and copies made to be brought along when traveling. Records left at school are kept in main office and keys are held by custodians and AD.
