

POLICY STATEMENT- SECURITY PRACTICES FOR CONTESTS

While many schools have measures in place regarding safety and security at athletic contests, all members are reminded of the importance of this area. The National Federation and the Kentucky High School Athletic Association have made a strong effort in reminding all state associations and member schools of the importance of member schools understanding the necessity for adequate security. Crowd control has become a major emphasis across the nation and though many schools have provisions in place, it is important to take every precaution to protect the athletes, fans and general public at contests. While acknowledging the expense of security, it is noted that this shall be an integral part of your athletic planning process.
